EXPERIENCE

May - December 2016 Industrial Engineer & Designer for CsysMould & IdeasBox
Company design studio and industrial factory with injection moulds, which development from the digital modeling and 3D printing prototype to production of the product, its packaging and the graphic information, facilitating formalities customer and accelerating the whole process creation.

April - June 2015 Product Designer for DESPERADOS
With two other college mates developed a new concept for Desperados or add something to the brand that did not have until now to come back to take off in the market, adding spherifications of tequila with lime on the inside of the bottle as a mini- shots.

January - March 2015 Product Designer for ZEN Barcelona
Three intense months where we put together on a team of four a collection of sunglasses for men, women and unisex for the brand Zen Barcelona.

ACHIEVEMENTS

My team and I were second place in Reto Aitex (2014), a challenge realized by the private organisation Aitex, textile technology institute, involved the Polytechnic University of Valencia and Elisava. Our idea was selected from over 200 projects, leaving in second place of the 10 selected for the final presentation.

HOBBIES AND INTERESTS

I thrive on teamwork and especially in environmental projects. Innovation is the base of my designs incorporating materials and technology which are very important in product development too.
